Physica B 263–264 (1999) 844–847

PHYSICA B

Subject Index

1/8 problem 663

α'-NaV_2O_5 803
Ab initio calculation 448, 687
Ab initio lattice dynamics 392, 452
Acoustic near field microscopy 553
Acoustic phonons 45, 455, 489
Acoustic spectroscopy 94
Acoustic wave diffusion 37
Acoustics 34
Acousto-electric 205
Acoustoconductance 504
Adiabatic bond-charge model 400, 424
AlN/AlGaN quantum well 552
AlN/GaN quantum well 469
Alpha-U 624
AlSb(1 1 0) 400
Amorphous ice 650
Amorphous polymer 276
Amorphous silicon 283
Anharmonic decay 713
Anharmonic effect 791
Anharmonic lattice modes 687
Anharmonic resonators 126
Anharmonicity 343, 381, 486, 683
Anion-related variations 492
Anisotropic thermoelectricity 617
Anisotropy of heat transfer 657
Annealing effects 163
Apical oxygen vibration 663
Astrophysics 595
Asymmetric 507

Ballistic propagation 223
Band mixing 813
Band tails 111
Bandgap renormalisation 546
BaO–Al_2O_3–SiO_2-glass 248
Bi/Sb superlattice 67
Binary alloys 296
Bi–Sb mixed crystal 67
Boson peak 160, 243, 258, 264, 280, 327, 336, 357
Brillouin scattering 70, 258, 306, 584, 666

C_{60} 766
c-axis infrared optical conductivity 772
Cadmium manganese telluride 545
Carbon 632
Carbon nanotubes 479
Cavities 489
CdSe 448
Ceramics 698
Chaos 445, 719
Chaos in an acoustic device 40
Charge density waves 51, 779
Clathrate hydrate 429
Cluster–cluster aggregations 317
Coherent charge oscillation 466
Coherent phonons 30, 45, 48, 51, 54, 67
Collective excitations 324
Composite fermions 205
Computer simulation 90
Condensed noble gases 163
Confinement 517
Cooling 621
Coupled excitation 522
Coupled modes 211, 233
Coupled quantum wells 466
Cryogenic detectors 610
Crystal lattice 105, 114
Crystal melting 364
Cu site substitution 636
Cubic lattices 439
$CuGeO_3$ 825
Cu–Sn 296
Cuprate crystals 674

d-Wave pairing 733
D-Sorbitol 310
Decay time 466
Deep centres 94
Defect chalcopyrite 806
Deformation potential 236
Dehydrated gel 327, 350
Delta-structures 230
Densification effects 299
Density of states 581
Density-functional theory 432
Dephasing by phonons 466
Depolarized spectra 306
Desorption 719
Diagnostics 84
Diamond 730
Diamond film 745
Dielectric absorption 129
Dielectric constant 759, 829
Dielectric dispersion 333
Dielectric properties 118
Dielectric susceptibility 129
Diffusion 156, 742
Diffusive propagation 727
Disorder 156, 190
Disordered interface 739
Disordered silicon 152, 280
Disordered solids 143, 149, 160
Disordered systems 118, 126, 133, 136, 293, 396
Dispersion 670
Dispersion relations 439
Dissipation 253, 321
Doped semiconductors 111
Doping effect 825
Dynamical properties 643
Dynamical structure factor 317
Dynamics 445

EAM potential 482
Effective isotropic media 63
Egg-white 327
Eigenvectors 376, 448
Elastic 350
Elastic constants 392, 666
Elastic modulus 327, 647
Elastic properties 139
Electric resistivity 674
Electromagnetic radiation 208
Electron focusing 223
Electron microscopy 632
Electron transport 498

Electron–phonon interaction 87, 111, 183, 187, 190, 193, 199, 202, 217, 224, 230, 239, 376, 408, 416, 452, 469, 476, 522, 537, 552, 624
Electron–phonon scattering 504
Electrons 170, 227
Elementary excitations 367
Energy loss 211, 233
Energy relaxation rate 227
Epitaxial growth 775
Exciton–phonon interaction 175
Excitons 809

Fano effect 803
Femtosecond spectroscopy 51, 54, 57
Fermi–Pasta–Ulam chain 723
Ferroelastic transition 577
Ferroelectrics 286, 584, 653, 784
Fine particle 482
Fluctuation 373
Fluorine 346
Force constant matrices 439
Force constant model 479
Fractional quantum Hall effect 196, 205
Fractons 286, 330
Fragility 313
Free-carrier absorption 208
Frequency down-conversion 233
Frequency-resolved spectroscopy 310
FTIR spectroscopy 108
Fullerene 632, 705
Fullerite 436

$Ga_{1-x}Al_xY$ semiconductors 492
GaAs surface 84
GaAs/AlAs superlattice 48
GaAs/Si 775
GaAs:O 122
Gallium arsenide 170, 381, 526
Gallium nitride 227, 727
GaP(1 1 0) 400
$(GaY)_m/(Ga_{1-x}Al_xY, Y = As, N)_n$ superlattices 492
$Ge:O_i$ 384
Gelation process 73
Germanium 60
Glass transition 306
Glasses 34, 253, 261, 264, 290, 321, 330, 343, 357, 799
Glassy materials 167
Glassy systems 324
Grüneisen parameter 822

hcp helium 412
Harmonics generation 719
Heat capacity 353
Heat conduction 678, 752
Heat exchange between helium film and gaseous He 736
Heat pulse 339
Hectorite 370
Helium film 370
Heterojunction 211
High pressure 276, 816
High-T_c cuprate superconductors 772
High-T_c super constructions 756
Higher-order elastic constants 40
Hole burning 81
Hopping 133, 261
Hot electrons 552
Hot luminescence 683
Hybridization 367
Hydrogen 293
Hydrogen bonds 442
Hydrogen chloride 666
Hydrogen/deuterium tunnelling 421
Hydrostatic pressure 118

Ice 396, 442
III–V semiconductors 392
Implanted amorphized layer 730
Impulsive stimulated Raman scattering 829
Impulsive stimulated thermal scattering 657
Inelastic neutron scattering 357, 396, 416, 632
Inelastic nuclear absorption 716
Inelastic X-ray scattering 412
Infrared 806
Infrared reflectivity 545
Inorganic glass 353
Interface phonons 462, 507
Interferometric detection 571
Internal friction 143, 346
Intervalley scattering 233
Invar 716
Ionic conductivity 759
Ionic conductor 759, 799
IR spectroscopy 122
Isotope effects 376, 381
Isotope shift 384

Junctions 621

$K_3D_xH_{1-x}(SO_4)_2$ 640
Kapitza conductance 217
KDP 829
$KHCO_3$ 657

LaB_6 749
$LaCoO_3$ 647
Landau theory 660
Landauer thermal conductance 459
Lattice 621
Lattice dynamics 136, 404, 416, 429, 432, 442, 739, 762, 832
Lattice vibration 835
Lennard–Jones 445
Librational mode 791
Light scattering 809
$LiNbO_3$ 819
Linearity 607
Linewidth 791
Liquid crystal 835
Liquid–glass transition 310
Localised excitations 545
Localised states 214
Localization 133, 156, 330
Long wavelength acoustic phonons 742
Loudon model 510
Low dimensional systems 239
Low temperature acoustics 559
Low temperature properties 149
Low temperatures 152, 296, 321
Low-energy dynamics 299
Low-energy excitations 280, 296, 303
Low-frequency Raman spectra 313, 835
Low-temperature anomalies 290
Low-temperature properties 248
Luminescence 501
Lyapunov 445

μeV resolution 574
Magnetic field 180
Magnetic impurity 636
Magneto-Raman 813
Magnetoacoustics 236
Magnetoelastic interaction 769
Magnetopolaron 813
Magnetoroton 196
Manganese oxides 691
Mass disorder 381
Maximum amplitude 553
Mesoscopic mechanical dissipation 459
Metal nanoparticles 54
Metals 193
Microcalorimeter 604
Microscopy 559

Modified borate glass 336
Molecular dynamics 90, 404, 482, 709
Molecular heat pulses 736
Molecular hydrogen 436
Molecular solid 795
Monochromatization 574
Monolayer 769
Mott transition 57
Mössbauer effect 574, 581
Multiphonon decay 683
Multiphonon relaxation 762
Multiple scattering of ultrasound 37

Nanocalorimeter 1
Nanocrystalline silicon 473
Nanoparticles 476
Nanostructures 1, 498
NbTi 293
Network-forming glasses 243
Neutron Brillouin scattering 264
Neutron irradiation 139, 152
Neutron scattering 404, 448
Neutron spectroscopy 421, 650
Nitride-based III–V structures 510
Noise reduction 16
Nonequilibrium phonons 695
Nonlinear effect in a SAW device 40
Nonradiative recombination 283

Optical absorption 167
Optical phonon scattering 208
Optical phonons 733, 806
Orientationally disordered phase 666
Oxide superconductors 636, 691
Oxygen concentration 822
Oxygen precipitates 108

Particle detectors 607
$PbZrO_3$ 816
Penrose tiling 146
Phase contrast 553
Phase instability 522
Phase time 455, 533
Phase transitions 408, 624, 643, 653, 660, 766, 779, 816
Phonon anomalies 416
Phonon avalanches 30
Phonon confinement 462, 469, 498, 546
Phonon counting 1
Phonon decay 473
Phonon diffusion 702
Phonon dispersion 448
Phonon dispersion in vitreous silica 268
Phonon dynamics 479
Phonon emission 183, 526
Phonon focusing 98, 564
Phonon hole burning 81
Phonon imaging 87, 361
Phonon interactions 705, 762
Phonon lifetimes 486
Phonon linewidths 452
Phonon localization 303
Phonon mean free path 752
Phonon optics 564
Phonon Poiseuille flow 678
Phonon propagation 482
Phonon pulses 211, 727
Phonon reflection 719
Phonon relaxation 702
Phonon scattering 514, 691, 702, 713, 745
Phonon shot noise 1
Phonon softening 716
Phonon spectroscopy 108, 122, 187, 196, 384, 501
Phonon squeezed states 16
Phonon transmission 739
Phonon-assisted transitions 462
Phonon-mediated superconductivity 772
Phononic crystals 77
Phonons 57, 105, 114, 133, 160, 170, 227, 396, 412, 517, 610, 698, 749, 756, 784
Phonons and vibrations in crystal lattices 687
Phonons in wurtzite structures 510
Phosphate glass 303
Photonic materials 567
Picosecond optics 530
Picosecond ultrasonics 571
Picoseconds 670
Piezoelectric powder 81
Plane defect 105, 114
Plateau widths 199
Point-contact spectroscopy 224
Polariton dispersion relation 829
Polarization 627
Polarons 756
Polyacrylamide 350
$Pr_2Cu_{1-x}Zn_xO_4$ 788
Pressure–temperature phase diagram 795
Propanol 306
PSAM 553
Pulse amplifier 577

Quantum 156
Quantum aspects of solitons 723
Quantum decoherence 459
Quantum dots 514
Quantum Hall effect 199, 202, 214
Quantum noise 16
Quantum paraelectrics 627
Quantum relaxation 253
Quantum wells 175, 501, 507, 526
Quantum wires 170, 180, 459, 504, 546
Quantum Hall effect 187
Quantum-well lasers 462
Quartz 412
Quasi-diffusion 339
Quasi-one-dimensional compound 678, 752
Quasicrystal 146
Quasidiffusion 610

Radiation effects 126
Raman 336, 806
Raman scattering 57, 258, 280, 283, 350, 381, 473, 640, 653, 663, 795, 803, 816, 819, 825, 832
Raman spectra 330
Raman spectroscopy 60, 489, 775
Raman-active modes 822
Rayleigh surface wave 70
Rayleigh wave 424
$Rb_3D_xH_{1-x}(SO_4)_2$ 640
Relaxation 193, 343, 766
Relaxation time 333
$RENi_5$ 224
Resonance 455, 533
Resonance phonon scattering 324
Resonant tunnelling structures 233
Rigid ion model 545
Rigidity percolation 313
RS–ARS mixed crystals 660

SAM 553
SAW attenuation 766
SAW propagation 84
Scanning acoustic microscopy 553, 588
Scanning electron microscope 223
Scattering 105, 114, 698, 784
Scattering by point mass defects 742
Second and third order elastic constants 63
Second sound 559
Selenium 264
Self-energies 376
Self-localized soliton 723
Semiconductors 492, 809

Shell model 448
Si(0 0 1)(2 × 1)-As 424
Silicon 108, 381, 709
SiO_2 glass 333, 346
Slippage 370
Smectic phase 835
Soft modes 584, 624, 627, 653
Soft potential model 143
Solid ^{4}He 364
Solid–solid interfaces 361
Solitons 670
Sol–gel technology 695
Sound wave 364
Specific heat 273, 660
Spectral resolution 595
Spectrometer 574
Spherical Fabry–Pérot 584
Spin wave 769
Spin wave excitations 202
Spin-Peierls transition 803, 825, 832
Spin-state transition 647
Spin–lattice relaxation 303
Spin–phonon interactions 788
Squeezed states 16
Stabilization 353
Static disorder 167
Stimulated phonon emission 537
Stop bands 77
Strain 775
Strongly localized modes 243
Strontium titanate 627
Structured materials 695
Superconducting devices 607
Superconducting tunnel junctions 595, 613
Superconductivity 87, 733
Superconductor 674
Superfluid helium 4 367
Superionic 799
Superlattices 45, 98, 486, 489, 492, 517, 530, 533, 537, 545
Surface acoustic waves 77, 180, 205, 214, 567
Surface excitations 90
Surface phonons 98, 400, 424, 482, 533
Surface wave 73
Synchrotron radiation 581

Thermal conductivity 102, 146, 261, 296, 353, 530, 636, 674, 691, 705, 709, 745, 749, 779, 788
Thermal diffusivity 353
Thermal properties 276, 293
Thermal relaxational mode 657
Thermo-elastic damping 486
Thermodynamics 273, 321
Thin films 84, 190, 217, 581
Third sound 373
Third-order elastic constants 258
Three-dimensional crystal 90
Time delay 455
Time resolved spectroscopy 45, 310
Time-series analysis for chaos 40
TiN/ZrN superlattices 70
TiO_2 (or Rutile) 102
Transition metals 432
Transmission spectrum 373
Tunneling 253
Tunneling defects 388
Tunneling states 129, 139, 149, 152, 163, 273
Tunneling systems 290
Two-color pump-probe measurement 48
Two-dimensional electron gas 183, 211

Ultrafast phenomena 193
Ultrasonic absorption 236
Ultrasonic attenuation 759
Ultrasonic measurement 370, 647
Ultrasonic microscopy in air 588
Ultrasonics 149
Ultrasound 577, 588
Ultrasound imaging 567
Unitary transformation 723
Urbach's rule 167

Vacancies 102
Vibration 336
Vibrational density of states 317
Vibrational spectra 136, 286, 799
Viscoelasticity 73
Vitreous silica 273, 299, 339
Voltage pulses 617
Volume imaging 553

Wafer-bonding 361
Wave propagation 564
Waveguides 819
Weak localization 230, 373
Wigner–Dyson statistics 136
Wurtzite structure 448

X-ray detection 604, 613
Xenon 683

$Y_2O_3 : Eu^{3+}$ 476
$YBa_2Cu_3O_x$ 822
Yoctocalorimetry 1
Young's modulus 346

Zero-point vibration or tunneling 640
ZrO_2 102
$ZrO_2(Y)$ 759
